Roof boxes

Trivor,
designing memories

BECAUSE YOU THINK BIG.

Trivor, it's time for adventure.

The Hapro Trivor is the ultimate outdoor roof box. An adventurous travel companion for all who believe no mountain is too high, no valley too deep. The design is sporty, contemporary and offers optimal ease of use - under all circumstances. Ski holiday, bike tour, survival weekend? Lack of space will never again stand in your way. Those who enjoy outdoor activities can pack and unpack their gear effortlessly with this spacious and easy to operate roof box. The Trivor is your stylish, extra boot - on the roof. **Are you ready to expand your life?**

THERE'S A COMFORTING CLICK...

...and it comes from both sides.

The Trivor is Hapro's next step in ergonomic design and ease of use. The innovative, centrally located automotive 'car handles' on both sides offer opening assist: the lid of the roof box is raised a few centimetres when it is unlatched. When the roof box is closed, the handle automatically retracts, and you hear a click when the roof box is securely latched. Keys? You don't need them for opening and closing. Only when you really want to lock the Trivor to keep out uninvited guests. Loading and unloading your luggage has never been easier.

SPORTY APPEARANCE.

Sleek, yet more room than you might imagine.

The Hapro Trivor combines robust looks with loads of space. Clean lines give the roof box a sporty look, without compromising on the spacious capacity. Prepare yourself for furtive glances.

UNPARALLELED SAFETY. The Hapro Trivor offers more than just a handsome appearance. Safety always comes first. The Trivor has therefore been subjected to a series of tests under the most extreme conditions. City crash tests, stability tests, vibration, water and wind tunnel tests: nothing has been left to chance. Two metal profiles run along the entire length of the bottom, providing optimum rigidity and stability. The Hapro Trivor passed all the tests with flying colours and is TÜV certified.

Material and colour:

The strong and shock-resistant ABS/PMMA synthetic materials of the Hapro Trivor are highly UV-resistant.

Reinforcement base:

The metal reinforcement rails over the entire length of the bottom provide strength and stability.

Mounting:

The unique patented Premium-Fit guarantees a quick, secure and easy mounting of the roof box.

Opening¹:

Loading and unloading the Trivor is simple due to the double function of the dynamic spring struts. It opens the lid and keeps it in its optimum position while loading. When closed they pull the lid to the base of the roof box for a perfect seal.

**Opening²:**

The Trivor can be opened on both sides. An extremely comfortable feature, allowing maximum ease of loading and mounting.

Available colours:

The Trivor is available in two colours, Brilliant Black and Supermatt Anthracite

**Innovative locking system:**

When the roof box is closed, the handle automatically retracts, and you hear a click. This tells you with absolute certainty that the roof box is securely closed. Lid down. Click. Ready!

Keyless ease of use:

The innovative locking system allows you to close the box safely and securely. Without the need for a key. You only use it if you really want to lock the roof box.

**Ergonomic handle:**

Opening and closing the Trivor is effortless. The ergonomic handle ensures remarkably smooth operation. That way you always have one hand free when opening the roof box.

Opening assist:

The handle activates a mechanism (opening assist) that lifts the lid a few centimetres. This makes opening the roof box a piece of cake.

START PACKING.

as if you have an extra car...

AN EXTRA BOOT - ON THE ROOF.

Sporty and sleek on the outside, yet spacious on the inside. The Hapro Trivor is a remarkably high roof box, yet it retains a slender appearance thanks to its cleverly crafted design. Depending on the model, you can store up to 640 litres of luggage with a maximum weight of 75 kilos. Put simply: you have an extra boot. It makes the Trivor ideal for outdoor holidays where you need a lot of equipment. The recessed bottom produces less drag while ensuring a tight fit between car roof and roof box.

IN A JIFFY.

The unique mounting of the Trivor.

The unique patented Premium-Fit is a complete, one-piece unit. No hassle with separate clamps or other accessories. The Premium-Fit allows a quick, easy and above all, a safe mounting of the roof box. Mounting and removing the roof box is done with a simple and smart turn of the rotating knob, which deploys special clamps around the roof rack. The reassuring ratchet noise tells you exactly when the roof box is securely fixed to the roof bars. Due to its limited height, the Premium-Fit system allows for even more space for your luggage.

SAFE AND SECURE.

Welding would be the lesser option..

The Trivor is attached to the roof racks with four Premium-Fits that can be shifted separately. Each one centers itself on the roof rack, which makes the Premium-Fit a perfect fit for any roof rack system with a maximum width of 95 mm. The clamps are covered with a synthetic material for extra grip and to protect the roof rack. Of course the Premium-Fit system has been thoroughly tested. The roof boxes are certified following the strict ISO 11154 and TÜV safety regulations.

SPECIFICATIONS.

All ins and outs.

The Trivor model is suitable for all standard roof rails. An adapter kit with T-lock profile is available for attachment to aluminium roof rails.

Distance between roof carriers in mm:
